WAYSIDE GARDENS

are Iocated at

MENTOR, OHIO

Twenty-five miles east of Cleveland, on the Cleveland-Painesville Road, at Stop 67, C. P. & E. Electric Line

Telephone, Mentor 39-K.

Stock Offered

All of the stock offered is grown on our grounds, that grown from cuttings and divisions we know to be clean and true and plants grown from seeds are from stocks obtained from the most reliable sources. The seeds don't always come true

Our plants are all field grown, are given constant care and cultivation and when sent out are strong and well developed, much larger than the pot-grown plants offered by most houses.

Terms of Payment

Our terms of payment are cash on delivery, which does not mean that we ship C. O. D. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send cash or references with their order.

Guarantees

We guarantee all nursery stock furnished by us to be firstclass, true to name.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

Inspection and Fumigation

Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when State laws require it.

Risk

All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

Shipping Directions

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route. Early orders for shrubs and bulbs can generally be shipped safely by freight.

Parcels Post

Small shipments can be sent by parcels post. All such shipments will be sent insured, insurance and postage to be paid by the customer.

AQUILEGIA (Columbine)

As a cut flower the Long Spurred Aquilegias are the daintiest of our outdoor grown flowers.

They come in blues and whites and yellows and shades of pink and rose in strains reasonably true.

Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived.

CHRYSANTHEMUM-Hardy Pompon FULL FIELD GROWN CLUMPS—NOT DIVISIONS

These are the small-flowered Chrysanthemums of the old-fashioned gardens, and bloom in October and November after almost all flowers are gone. They are showy in the garden, and effective as cut flowers and, being perfectly hardy and of easiest culture, can be successfully grown in any garden. We offer a fine collection of the best varieties, ranging from white to deep crimson.

DELPHINIUMS (Tall English)

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increases in size, in beauty, and often in quantity, year after year. Delphiniums may not be the most beautiful hardy plants, but they are among the most beautiful, and nothing can be more satisfactory. Some varieties growing 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long, in fact, they will bloom from spring till fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in summer the plants are not too forward, and that they be well watered if the weather be dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. They are grand grown in masses of large groups and may be associated with shrubs to great advantage. A succession of flowers may be expected from spring to early autumn, especially if the spikes which have done flowering early be cut down to the ground; fresh growth will then be produced which will give blossom. Watering in summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf alpine and other hardy plants my be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through winter and spring. Any garden soil suits the Delphiniums.

Special Offer of English Delphiniums

Variegata. Variegated foliage; blue flowers. Beautiful edging plant. Per eye or crown, 10c Subcordata Grandiflora or the white scented day lily		
FOXGLOVE (Digitalis)		
For stately and picturesque beauty it is not to be surpassed and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchard or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial. Planted		
in the fall, Foxgloves will bloom well the following season in 3 colors	3.00	20.00

GAILLARDIAS (Improved)

We consider the Gaillardia one of the most desirable hardy plants in cultivation, and our strain of these brilliant-flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with extremely simply treatment. Dig the soil deeply and enrich with well-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Every one will have noticed how grandly Gaillardias have thriven through the recent draught; they seem hardly to need water, but we recommend watering liberally to insure the finest flowers. The gay blossoms are obtainable in perpetual profusion from June to November, and the greater the draught and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more brilliant and beautiful sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches in diameter.

HOLLYHOCKS

Painters choose single Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common, single Hollyhock, is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group or mass of single Hollyhocks, and once planted they will literally take care of themselves, even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. We are determined to have single Hollyhocks. We collected seed from old-fashioned gardens and had thousands of plants grown for our customers. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be top-heavy. Hollyhocks planted in the fall will bloom the following summer.

fair will bloom the following summer:	_	_

GERMAN IRIS

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright

after the blossom stalks are removed.

Planted in late August or early September they flower very freely the first season.

For use as cut flowers they are rapidly gaining in popularity with

Florists.

JAPANESE IRIS

IRIS KAEMPFERI

When these Irises are in bloom they excite the greatest admiration and enthusasm, and it is hard to convince people that these unique and exquisitely beautiful flowers are as hardy as trees, and easily grown. They will thrive in any good garden soil. These Irises should be planted in full exposure to the sun.

in tuil exposure to the sun.	D	Per 100
In four distinct colors. Mixed shades	3.50	25.00 17.00
IRIS PUMILA		
These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower-beds or planting in front of the tall Irises. Atroviolacea. Dark violet-blue.	3.50	25.00
SIBERIAN IRIS		
Vigorous, free-flowering varieties of the easiest culture; fine for the flower border, for naturalizing and for waterside planting. Snow Queen. An exquisite new hardy Iris; the flowers are of a snowy whiteness, large and well formed, produced in great abundance; foliage light and gracefud. A gem for flower-		
border or waterside. Three feet high	2.00	15.00 15.00
LATHYRUS		
Latifolius splendens. Bright pink or red Latifolius albus (White Everlasting Pea). These Everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine	2.50	17.00

RARE LILY FROM CHINA LILIUM REGALE or MYRIOPHYLLUM

(The Regal Lily'. Mr. E. H. Wilson, the famous plant collector, collected the original bulbs in North-Western China. He considers this the finest of all Lillies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-or-doors early in July. Awarded a Gold Medal by the Massachusetts Horticultural Society, and a first-class certificate at the Royal International Exhibition, London, 1912. (Bulbs ready in October.)

PHLOXES—HARDY PERENNIAL

The beauty and usefulness of these grand border plants give to them a deservedly first place among hardy plans. For cutting, their large trusses go a long way in floral decoration. In color they range from pure white to the richest crimsons and purple, and from soft rose and salmon to bright coral-red, all having a delicate fragrance. Perennial Phloxes succeed in almost any soil enriched with manure, but are much benefited by a mulching of decomposed manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in autumn. These later blooms are often finer than the first.

PYRETHRUMS

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. They are perfectly hardy and absolutely invaluable for cut flowers through the summer and autumn months. The flowers are bright and elegantly borne on long stems; most convenient for decoration. In form the double varieties are somewhat aster- or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest winter without protection. The single-flowered varieties are variable colored marguerites and possess a range of color and hardiness that marguerites might envy in vain. Nothing can surpass the Pyrethrum for profusion of flowers, and the blossoms are not injured by storm or sun. Their position should be in the border or in beds. The plants may, with advantage, be cut down after June, which will keep up a greater succession of bloom through the autumn. Pyrethrums grow freely in any ordinary garden soil; a good rich loam suits them, perhaps, best and in order to secure size, brilliancy and number of flowers, plenty of ordinary well-rotted manure may be added to well-trenched, well-drained soil, and plenty of water may be given when they are in bud in the dry summer weather. A mulching may be applied in dry localities with advantage. The older varieties have been greatly improved upon during the past ten years, and the refined shape and brilliant or soft shades of the newer sorts have caused the Pyrethrum to become deservedly popular. We offer a splendid lot of plants of the choicest varieties grown from famous strains.

DESCRIPTIONS AND PRICE LIST OF PEONIES

The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers.

GLADIOLI

One of Our Leading Specialties

Constant improvement in the Gladioli has greatly increased interest in them and they are being planted in greater numbers each season. For cutting purposes, the bulbs may be planted in rows 12 to 18 inches apart, setting the bulbs 3 to 4 inches apart and planting to a depth of 6 inches. The flowering spike should be cut just as soon as the lower flowers open; the remaining buds will open if kept in fresh water and the open flowers removed as they fade. A little of the stem should be removed when the water is being changed. Treated thus, a spike will last over a week.

For garden planting, they perhaps appear to best advantage in groups or masses and are best used in conjunction with some annual or bedding subject where they can be timed to flower in late summer when garden color is most desired. Groups can also be used effectively in the perennial border. A more continuous effect can be had by making successive plantings, beginning as soon as the ground can be worked in early spring and planting at intervals until June.

The bulbs, which increase from year to year, can be carried over winter in a cellar that is kept above a freezing temperature, much as potatoes are stored.

potatoes are stored.

Peace. Gigantic flowers are borne on a magnificent tall spike, often attaining a height of 5 feet; the entire plants show a vigorous, healthy constitution. The wide open flowers are of a glistening white, with an attractive narrow stripe of purplish carmine through the center of each lower petal	1.00	8.00
Pink Perfection. In color a true LaFrance pink. Its soft coloring and magnificent bloom make it one of the choicest of the newer varieties. Large open flowers on a strong spike	1.50	12.00
Pink Beauty. Pale carmine with large geranium blotch on lower petals. Very early	.50	8.00
Prince of Wales. A clear grenadine pink or deep buff, with throat markings of a deeper tone. The tips of petals shaded darker or apricot buff. A novelty of great value, eight or ten blooms open at one time on a long graceful spike	2.00	16.00
Pride of Hillegom. The best scarlet gladiolus, a most	2.00	10.00
wonderful variety	\$1.00	each
Princepine—Carmine red with large white blotch	.75	6.00
Red Emperor—A pure deep scarlet, immense flowers of great substance, well placed upon a tall spike	50c	each
Schwaben—This is the largest and strongest flowered yellow Gladiolus. A clear citron yellow with Aster		
purple tongue on lower petals Buds sulphury yellow	1.00	8.00
War—Crimson blood-red, with deeper shadings; very tall and striking Massive spikes of flower	1.50	12.00
White Giant—Pure white enormously large flower, strong grower First class certificate; Haarlem	50c	each
Willy Wigman—Beautiful blush white, with dark carmine blotch	.75	6.00
Yellow Hammer—Pure yellow, extra strong grower	.75	6.00

If you are in doubt what to order of Gladioli, let us make a selection for you. Simply give your preference in colors and we will select for you. There is no other flower, bulb or plant in the world which gives one as much pleasure and value for money paid out as the Gladiolus.

GLADIOLI

Primulinus Hybrids

These Hybrids, gained by crossing the species Primulinus with the larger varieties of the Gandavensis type, have retained the dainty and graceful form of their Primulinus parent even to the hood, formed by the drooping of the upper petal and have an added beauty of exquisite coloring from the softest primrose to the palest rose They are among the finest bulbous plants for early Spring work and cannot be too strongly recommended to any person who is not acquainted with them Can be planted any time during April or May

HARDY ORNAMENTAL SHRUBS

The collection of shrubs given below is not as large as one will find in some catalogues, but we have endeavored to list only those shrubs which can be used in and around Cleveland for home planting. All the stock offered is grown on our own nursery and we know it to be true to name, clean and healthy. We must earnestly ask our customers to mail their orders as early as they can, because careful investigation of the nursery business shows that there is a tremendous shortage of good shrubs, plants and bulbs. Place your orders in the fall and have stock delivered the following spring, if you cannot plant it at once.

ALTHAEA	Cach	Dor.
The Altheas (Rose of Sharon) bloom in August and September, showing many rich shades of all colors. They are very hardy, easily cultivated, and will bloom until their growth is cut short by frost. Grown in standard form, they make good specimens, 8 to 10 feet high, resembling small flowering trees; planted thickly, they are popular for flowering bedges, as they will endure considerable pruning. This should be given in winter.	acn	<i>D</i> 02.
Jeanne D'Arc. Best of the white, dcuble Altheas. Hardy and free-flowering	.60.	6.00
Totus Albus. Pure white, single flowers of fine size and great beauty	.60.	6.00
Amplissima. Beautiful pink, free-flowering	.60	6.00
Boule de feu. Bright red	.60	6.00
ARALIA PENTAPHYLLA		
Long, slender, gracefully arching branches and brright green, compound foliage. Makes a small tree in time, especially attractive on rocky slopes. Greenish white flowers in long umbels	.60	6.00
BERBERIS—BARBERRY		
Thunbergi. (Thunberg's Barberry). Inimitably neat and dense in growth, barely 3 feet high under the best conditions, yet quite graceful because of its drooping branches. The yellow flowers are followed by scarlet fruits borne in dense profusion on the long stems and clinging through mose of the winter; the leaves color to scarlet and gold in autumn.	.25	2.50

BUDDLEIA ("Butterfly Bush," "Summer Lilac"	')	
One of the most admired and sought-after shrubs. Of quick bushy growth, bloom-spikes appear in July, the shrub dies down nearly to the ground during winter, perfume and flower shape of the Sprnig Lilacs	Each	Doz.
Magnifica. This variety is selected from several good sorts as being the hardiest for all sections. Flower spikes 10 inches in length by 3 in diameter are not unusual. Color deep violet-rose, with a pronounced orange center	.50	5.00
CORYLUS—FILBERT, HAZEL		
Avellane, Atropurpurea. (Purple-leaved Filbert). The Hazels are sometimes used as hedges and are valuable for this purpose. In early spring the long, drooping catkins are very beautiful, and in fall the shrubs bear large quantities of delicious nuts. This variety is particularly valuable for group effects, the large, purple leaves holding their color well. It grows to a height of 10 to 12 feet	.60	6.00
CYDONIA IADONICA (Issue Ovince)		
CYDONIA JAPONICA (Japan Quince) Very early in spring this shrub is completely cov-		
ered with dazzling scarlet flowers; followed by small, quince-shaped fruits which are quite fragrant. Growth bushy with protecting thorns	.40	4.00
CALYCANTHUS (Carolina Allspice; Sweet Shr	uh)	
Floridus. A unique shrub, growing rapidly upright to 6 feet, clothing its straight, strong, reddish brown shoots with large, glossy leaves, from the axils of which spring odd, double, spicily fragrant flowers of chocolate-red. This is the old-fashioned "shrub" that the children tie in the corner of their handkerchiefs. One of the earliest to bloom in the	40)	
spring	.50	5.00
CORNUS—DOGWOOD		
The Dogwoods, one of tall growth and bears large flowers. The shrubby Dogwoods, in many cases, have very pretty flowers, but are calued for their fruits, leaf-variegations and bright-colored bark. If planted in lines or groups against evergreens, the bark is very showy in winter, especially if pruned yearly to make the growth of young shoots thicker.		
Sericea. (Silky Dogwood). Conditions make this shrub vary in height from 3 to 10 feet. Has purplish branches and dense cymes of greenish white	40	4.00
flowers and black fruits. Blooms in early summer. Stolonifera. (Red Osier Cornel'. A medium-sized,	.40	4.00
spreading shrub, with dark red bark and white flowers, followed by white berries	.60	6.00

CLETHRA	Each	Doz.
Anifolia. (Sweet Pepper Bush). A little shrul fragrant in September, when covered with long showy wands of white flowers. It is valuable for the front of the border as it grows only 3 to 5 feet tall and is very sturdy and compact. Its beautifur flowers make a splendid show in the border at time when white flowers are becoming scarce	s, r et el a	4.00
DEUTZIA		
No other shrub in the whole list will yiel better returns for a minimum of care than the Deutzias. They vary in height and habit, but all have dainty bellor tassel-shaped flowers born thickly in wreaths along their branches in June The taller sorts are useful for specimens, groups and the background of shrubberies; the dwarfe for borders or for planting near the house. Pride of Rochester. A showy, early, and large-flowerin sort, that blooms in May before the others. Grow 6 to 8 feet tall. The white flowers are large an double	e	4.00
Candidissima. The pure white double flowers in erect panicles 2 to 4 inches long, are so perfect in shap that they are frequently used as cut-flowers. The bush is neat and shapely, growing 6 to 8 feet high	e e	
and is a handsome addition to any planting	40	4.00
FORSYTHIA—GOLDEN BELL		
These shrubs, growing 8 to 10 feet tall i good soil, light up the garden with masse of yellow, very early in spring, before the leaves appear, and usually blooming with the crocuses, which are frequently planted in front of and beneath them. All are of strong growth, entirely hardy, with curving branches that sometimes roof at their tips; stems and leaves retain their colountil late fall.	es e - f - t	
Intermedia. One of the most floriferous, with sler der, arching branches, and dark green, lustrou leaves. It blooms so early that it is frequently	s y	
covered with its bright golden flowers while the ground is covered with snow	40	4.00
Suspensa. Long, curving branches; used for cover ing arches and trellises.	. 40	4.00
Fortunei. The handsome, more erect form generall known		4.00

HYDRANGEA	Each	Doz.
Such a showy class of shrubs is natural well known and very generally planted. H. paiculata and its varieties are quite hardy anywher The more tender garden varieties need some prefection in cold climates. The great flower-head last for a month or more in perfect condition. Arborescens Grandiflora. A grand addition to the summer-flowering shrubs; dwarfing the show other sorts in July and August by the magnitude and profusion of its flower-heads. The flowers as similar to the "Snowball" and are so conspicuous white that whether as specimens, as cut-flower	n- e. o- ds he of de re ly s,	
or in groupings, their presence is predominant Paniculata Grandiflora. Severely pruned every Sprin before the leaf buds open, will get to be ve dense. Wonderfully attractive when laden wi massive white plumes. Large beds, kept unifor are extremely showy; first snowy white, the pink, then reddish bronze and green. Augu	ry th em	4.00
till winter		4.00
HONEYSUCKLE, (Bush Lonicera) The shrubby Honeysuckles have bright and pret fragrant flowers, followed by showy berries.	ty	
Tatrica. (Tartarian Honeysuckle). One of the be species, 8 to 10 feet tall. Its pink flowers in la spring contrast beautifully with its bright gree foliage, but its chief charm is its wealth or orang or red berries which literally cover the plant summer and autumn. All the varieties are note	te en ge in ed	
for their bright berries	h. ed	4.00
all summer	60	6.00

KERRIA JAPONICA (Japan Corchorus).		
A handsome, green-leaved shrub growing 4 fer Slender branches with a wealth of rich, yello double flowers in June, and to some extent a summer	w, all	5.00
Variegata. The choicest of the dwarf growing shrub. The foliage is dense and profuse, so variegate with white as to present a striking appearance. The flowers are as large and yellow as on the talle	ed ne er	
type, and appear at intervals all summer	60	6.00

LIGUSTRUM PRIVET	Each	Doz.
Besides being one of our best hedge plant the different species of the Privet form in teresting groups on the lawn. White flowers grow in sprays, are fragrant, and followed by berries of different colors.	1- W	
Ibota. (Ibota Privet). A fine hardy border shrul spreading habit, growing 8 to 12 feet tall, curvin branches and leaves of grayish green. Pure whit flowers appear in June, to be followed later by the state of the	g e y	2.50
bluish black seeds, which persist until winter Rogelianum. (Regel's Privet). Horizontal, sometime drooping branches. The plant is dense and compact, growing 6 to 10 feet in height, with longe leaves than other varieties. Blooms in June an	es 1- er	2.50
July with panicles of white flowers	25 as a- t. d	2.50
in June, in dense, upright panicles	a- et h	2.00 5.00
MAHONIA Aquifolia. (Holly-leaved Mahonia). Sometimes in cluded under Berberis. Handsome native evergree of medium size, with shining, prickly leaves an showy, bright yellow flowers in May, followed b bluish berries. Useful in decorative planting fo its neat habit and fine bronze leaves. Evergreen	a- en d y or	6.00
PHILADELPHUS (Syringa or "Mock Orange Grandiflorus. The most vigorous species of the group, growing 10 feet high. Long, irregular branches are clustered with large, fragrant flower in June	ne r 's	5.00
RHUS Aromatica. (Fragrant Sumac). A short, branch shrub, from 2 to 4 feet tall, with striking foliag and yellow flowers disposed in clusters along th stems. The red berries mature in June, and is	ge e n	
autumn the leaves color to brilliant scarlet, makin it very attractive	en y e	4.00
branches are cut close to the ground, causing it t send up strong shoots producing the largest leaves Copallina. (Shining Sumac). Tall growing; foliag glossy. Fruits large, deep crimson. Foliage color	s75 e	7.50
beautifully in fall; 2 to 3 feet		7.50

SAMBUCUS (Elder)	Each	Doz.
These shrubs are chiefly grown for their beautifu leaves. They grow well in all soils, and mus have vigorous pruning to keep them in shape. Acutiloba. (Cut-leaved Am. Elder). Handsome, white fragrant flowers in June and July, followed by large clusters of fruit	t ,	6.00
Aurea. (Golden Elder). The golden yellow leaves of this European Elder give heightened effects in tone and color. Flowers white, in flat topped cymes Grows naturally 10 to 15 feet, but can be pruned into a neat compact bush	f e	6.00
SPIRAEA		
All the Spireas bloom with a riotous extravagance. A good collection of them will give flowers all through the season. All the species are hardy easy to grow in many soils and situations, and will be found useful for specimens, groups, screens borders, ornamental hedges, etc.	; !	
Callosa Rosea. Of compact growth, 4 feet high, with upright branches and bluish green foliage; crowded with large, flat clusters of pink flowers, nearly all summer. Pink.	l	6.00
Anthony Waterer. Dwarf, bushy, and with large corymbs brilliantly colored rosy crimson. Free flowering, at its best in late summer. This is practically the only good showy red flowered shrub sufficiently dwarf to be used in plantings or the low	•	
Thunbergi. A dense, fluffy bush, 3 to 5 feet high; the foliage is a pleasing shade of yellowish green changing in autumn to bright red and orange	·	5.00
Flowers pure white, borne in masses in spring Van Houtte. The grandest of all the Spireas, and one of the very best of all shrubs; a complete fountain of	.60	6.00
pure white bloom in Many and June	.60	6.00
These shrubs are valued for their fruits, and for use as undergrowths in densly shaded places where little else will grow. The two species below are of medium growth, and will flourish under trees.	-	
Racemosus. (Snowberry). Flowers rose-colored leaves dark green; fruits milk-white; persistent until winter. Grows 3 to 5 feet tall	.50	5.00
Vulgaris. (Coral Berry; Indian Currant). Like the Snowberry, except that its fruits are red, and that the red berries cluster along the stems, which droop beneath their weight	t)	F 0.2
peneath their weight	.50	5.00

TAMARIX	Each	Doz.
The Tamaris are hardy shrubs of strong by slender, upright growth. Their foliage is light an feathery as asparagus, and they are valuable fo planting near the seaside. Africana. Bright pink flowers in slender racemes i April and May. Shrub is 15 feet tall	d r	7.59
VIBUDNUM (Snowball)		
This is a showy group of shrubs that usuall grow from 5 to 10 feet high, bloom lavishly i spring, bear fruit and turn red or purple in fal Acerifolium. (Maple-leaved Viburnum'. Slender, upright branches, 3 to 5 feet tall, with maple-like foliage and creamy white flowers in late spring	n l. o-	
followed by black berries. Dentatum. (Arrowwood). A bushy shrub with bright green, heart-shaped leaves, which change into ric purple and red. Creamy flowers in late spring of early summer. Berries blue-black. Grows 8 to 1	h or	6.90
feet in height. Lanthana. (Wayfaring Tree). Grows 10 to 15 feetall, with heart-shaped, crinkled leaves, and white flowers in Many and June; fruits bright red	60 et e	6.00
Opulus. (Hight Bush Cranberry). 8 to 10 feet. Dense brilliant green feliage; large bunches of crimso berries, late summer and persist on bare branche	e, n s	6.00
into thte winter		6.00 6.00
WEIGELA		
This family of shrubs is one of the most usefu and is rarely omitted from any mixed grou Most varieties grow quickly to an ultimate heigh of about 6 to 8 feet, usually with long archin branches. During May, June and July, they bea a great profusion of bell-shaped flowers whice closely hug tthe stems.	p. t g r	
Eva Rathke. The most distinct and one of the most attractive varieties; flowers deep carmine red	75	7.50
Rosea. This is one of the most popular of all the Weigelas; tall growing, with deep pink flowers is abundance during June, and more sparsely at in	n ı-	
Rosea Nana Variegata. Dwarf leaves, broadly margine white; flowers pink. This variety is one of the most useful variegated leaved shrubs. It is almost useful variegated leaved shrubs.	đ e	6.00

HARDY VINES

CLEMATIS	Each	Doz.
Of all the vines used either for shade or decoration, none can compare with the Clematis. Paniculata holds the lead both as a shade producer and for its abundance of bloom. It is a rampant grower in good soil, and the lateness of its bloom, coupled with the exquiset perfume of its flowers, makes if one of the most desirable of all vines. Paniculata. (Sweet-scented Japan Clematis). Raping growth, covering trellises and arbors with hand some, glossy foliage. The flowers are fragrant, pure white, in immense sheets in September, when few other vines are in bloom	- d r d t d - e e	3.00
ARISTOLOCHIA		
Sipho. (Dutchman's Pipe). A hardy vine of rapi growth, with very large, heart-shaped leaves an flowers, resembling pipe. Splendid for archways of verandas, as it is a rapid grower and forms a dense shade. A splendid vine for a sunny veranda	d r e	5.00
AMPELOPIS VEITCHI (Boston Ivy)		
This is the finest hardy climbers we have for covering walls, as it clings firmly to the smootthes surface, covering closely. The color is a frest deep green in summer, changing to the brightes shades of crimson and yellow in autumn	t h t	6.00
BIGNONIA RADICANS (Trumpet Flower)		
A robust woody vine; orange scarlet trupet shape flowers. Will climb to great heights on trunks of ttrees, and for every purpose is one of the most ornamental, both as to foliage and fllowers, among vines	ef t g	4.00
KUDZU VINE.		
Large foliage shade, growing 50 feet in one season Flowers plentiful in August; rosy-purple, pea shaped		5.00
HONEYSUCKLE		
Their vining qualities are all that can be desired but the fragrance of their flowers makes thei strongest bid for favor.	r	
Halleana. Color, an intermingling of white and yel low; exteremely fragrant and most satisfactory		4.00
WISTARIA		
One of the handsomest vines for use on pergolas porches and trellises; attractive foliage and magnificent, drooping clusters of pea-shaped flowers.	;-	
Sinensis. Blue. Panicles about 12 inches long	60	6.00

Goods are sold F.O.B. Warehouse and travel at Purchaser's risk. Packing will be charged at cost. Accounts are due one month after date of invoice; 2% for cash. No warranty is given for the results of planting, forcing or flowering of any bulbs or roots.

PLANT THIS FALL

This question is often asked: When is the best time to plant, in fall or spring? The answer depends upon what is to be planted, and the time the question is asked. If asked in the summer, then fall is the best time to plant all shrubs, and herbaceous plants of unquestioned hardiness, furthermore, the fall is a time of leisure and the weather is more favorable and the soil is usually in better condition to work than it is in spring, wet and cold as it usually is. It must be remembered, however, if the best results are wanted with herbaceous plants, they should be planted early enough in the fall to become established before freezing weather sets in, otherwise they are apt to be thrown out of the ground by frost. This can be prevented by a mulcing of stable manure. As far as possible, we would advise the planting of hardy plants, early in Peonies and Iris especially give better results when planted in the fall; shrubs may be planted from the 15th of October until the ground freezes. When anything is ordered that should not be planted until spring, we do not ship until then.
